SUMMARY

Lifecycle and growth marketer who builds the whole system: the email program, the product around it, and the sending infrastructure underneath both. Built a direct-to-consumer brand end to end on Shopify and Klaviyo, growing its list to 375 subscribers with no ad spend, and co-founded and built a multi-tenant retention platform for independent coffee shops.

EXPERIENCE

Co-Founder, Growth and Product

myReturners · Aug 2026 to Present

- Co-founded a multi-tenant retention platform for independent coffee shops and built the entire product. Deployed and running at myreturners.com since August 2026, onboarding the first pilot shops now.
- Built the customer-facing system: QR signup, mobile capture, Apple and Google Wallet punch cards wired to stamp and email data, and a barista lookup tool for the counter.
- Built the client health layer: an operator console that flags accounts trending toward churn from underperformance, so I reach the owner first, plus per-shop dashboards showing retention rate, second-visit rate, and per-location performance.
- Built the lifecycle program: 10 automated flows plus a monthly owner report, on a 14-component modular template system with per-shop brand tokens, consent capture, suppression, and frequency caps.
- Built per-shop authenticated sending: each shop provisions its own subdomain with SPF, DKIM, DMARC, live DNS verification, and automated bounce and complaint alerting.

Founder

Aurean, DTC jewelry brand · Mar 2026 to Aug 2026

- Grew a pre-launch email list from zero to 375 subscribers with no ad spend and no existing audience.
- Wrote and placed the organic content that built it: 200,000+ views across Reddit and Facebook communities, including a single post that reached 120,000+.
- Wrote and sent 17 campaigns to 6,089 recipients, averaging a 45% open rate and 3.2% click rate, with a top performer at 53% opens and 6.7% clicks.
- Architected 10 Klaviyo lifecycle flows: welcome, checkout and browse abandonment, post-purchase, and review requests, plus segmentation and DNS authentication.
- Built the Shopify storefront in Liquid and ran the brand end to end: product architecture, a custom sizing system, structured data for search and AI answer engines, overseas manufacturing, DDP shipping, and in-house fulfillment.

Founding Director of Marketing and Growth

MedSpeak AI · Jun 2025 to Feb 2026

- Founding team member at an AI voice assistant startup for medical practices. Led marketing, growth, and brand from launch.
- Built the go-to-market motion: positioning, launch copy, promotional video, and the first content presence on LinkedIn, Instagram, and email.
- Ran outreach to med spas, dental practices, and clinics, testing messaging directly with decision makers.

Founder and Operator

Relocashion, e-commerce resale · Jan 2021 to Present

- Founded and operate a vintage resale business across eBay, Depop, and Facebook Marketplace. 15,000+ pieces sourced, photographed, and listed with distinct positioning per platform.
- Five years of continuous profitable operation through platform algorithm and fee changes. Ran the largest booth at Indiana University's BYOB business showcase.
